NORAP Committee
- DR. REYNALDO V. LOPEZ

Greenbook 5 Committee
- DR. LENDELL JOHN Z. GATCHALIAN

Board Resolution #2-S-2023 Resolution on Improvement on eLogbook Entries

WHEREAS, The Philippine Board of Orthopaedics, Inc., is the official accrediting and examining arm of the Philippine Orthopaedic Association (POA) and is tasked with accreditation of Training Programs in Orthopedics in the country as well as conducting the PBO Diplomate Examination, the Certifying Examination in Orthopaedics.

WHEREAS, The Board, as part of accrediting resident and institutions, has instituted the Elogbook as a case portfolio of residents as well as the official record of cases of an institution.

WHEREAS, The Board in its function to continually improve on the features of the elogbook, has approved additional features on the elogbook to make it more efficient and organized.

BE IT RESOLVED, AS IT IS HEREBY RESOLVED that the Board has approved on the Board Meeting last May 13, 2023 the following:

1. Entries for procedures should be entered within two weeks from said procedure. If the date of the procedure is more than 14 days from the time of entry, it cannot be entered anymore.
2. A check box will be added in a separate column of the elogbook. Once the elogbook entry has been reviewed by the consultant or the training officer, from his account, he can put a check to signify that all entries have been reviewed.
3. On the outcome column, a drop-down date for every follow-up is going to be added, and the date of follow-up is a must.
4. Classify outcomes as immediate (less than 14 days), Intermediate (14 days to 90 days), and Long Term (more than 90 days).
5. An entry for the discharge date should be added for every admission.
6. Learnings entry should be in a different column
7. In the label of the census, should include number of cases for table one (1) and number of procedures for table two (2)
8. The first two (2) numbers of the RUV code will be used as the limiter for the number of cases per region in a procedure entry.
9. There should be a tick box for laterality of procedure.

Unanimously Approved:
